

Gain Confidence In Your Decision Making With Comparative Methods

A course
of at least
2-days duration

"I Feel Quite Certain About It. I Think. Probably !"

When you think about it, we are often making decisions in business based on comparisons.

"Is Process A better than Process B ?"
"Should we go for this supplier or that supplier ?"
"Is this machine worse than those machines ?"

Comparative methods is about taking much of the guesswork out of such decisions. We quantify the confidence with which you can trust a result.

The techniques are based on Hypothesis Testing which modern software makes accessible to non-statisticians.

We cover a broad variety of decision making situations and provide you with the steps to follow.

This training can be customised to suit a range of requirements. Simply give us a call and we can devise the solution you need.

Participants should have access to a PC in the training room with Minitab and preferably also Excel pre-installed. If you don't have such a facility we can help you. The PC's do NOT have to be networked

We encourage students to bring their own data sets (if possible) which we can work on.

The price of this training does not include Minitab Software. A fully functional free 30 day trial is available from www.minitab.co.uk

Comprehensive course manuals are provided.

For more information please contact us.

Training & Consultancy

Our menu of training courses continues to grow. Some are listed below. If you can't find the one you are looking for we will create it for you. Give us a call !

- Lean & Six Sigma
