

Lean Six Sigma Green Belt

Flexible
Number of 2-day
Modules

Deliver Important Projects With Lean Six Sigma !

As a working Green Belt you will :-

- Be trained to a high level in process improvement and problem solving
- Be ready to deploy the Lean Six Sigma toolkit to deliver real performance improvement
- Have the right mix of technical and people skills to successfully deliver projects

Our Green Belt training is designed to give you all the tools and skills you need. It is modular in fashion and can be customised to the needs of your organisation.

The Green Belt course has been designed as a stepping stone on the way to achieving Black Belt certification. It is a straightforward bridge from Green to Black.

Our training has been developed over a number of years and represents best practice in this field. We like our sessions to be interesting, challenging, and fun. The feedback we get is outstanding !

See also our Open Courses !

This is in-depth training and requires some discussion with senior management regarding expectations and support. There are also some decisions required regarding certification.

There is a need to provide Minitab software during the course.

Comprehensive course manuals are provided.

For more information please contact us.
