

Process Improvement With Minitab

A Range Of
Courses Beyond
Beginner Level

Minitab – An Invaluable Tool For Process Improvement !

*Established in 2001,
we have become
leading providers
of training and
consultancy in the
field of
"Improvement"*

These courses assume that participants have already had a grounding in the use of Minitab, can use the basic functions of the software, and know how to perform graphical analysis.

There are a huge range of options that we can cover - hence we need to discuss your requirements. Some examples might be :-

- Process Control
- Quality Sampling
- Establishing Measurement Capability
- Hypothesis Testing
- Design of Experiments
- Prediction Techniques

This training can be customised to suit a range of requirements. Simply give us a call and we can devise the solution you need.

Participants should have access to a PC in the training room with Minitab and preferably also Excel pre-installed. If you don't have such a facility we can help you. The PC's do **NOT** have to be networked

We encourage students to bring their own data sets (if possible) which we can work on.

The price of this training does not include Minitab Software. A fully functional free 30 day trial is available from www.minitab.co.uk

Comprehensive course manuals are provided.

For more information please contact us.
