

Applying Statistical Process Control

A course
of at least
2-days duration

Learn How To Gain Control Of Your Processes !

SPC techniques are much more accessible to people these days thanks to the utility of modern software.

The tools are now easier to learn and apply.

In this course we cover applications of SPC in both office and production environments.

We cover :-

- How and when to establish process control
- The key control charting methods (a little theory – a lot of practice)
- Selecting the right control mechanisms for your particular situation
- Traditional and new techniques

After Improve Comes Control !

This training can be customised to suit a range of requirements. Simply give us a call and we can devise the solution you need.

Participants should have access to a PC in the training room with Minitab and preferably also Excel pre-installed. If you don't have such a facility we can help you. The PC's do NOT have to be networked

We encourage students to bring their own data sets (if possible) which we can work on.

The price of this training does not include Minitab Software. A fully functional free 30 day trial is available from www.minitab.co.uk

Comprehensive course manuals are provided.

For more information please contact us.

Training & Consultancy
