## Better Decision Making

A course of at least 2-days duration

When you think about it, we are often making decisions in business based on comparisons.

"Is Process A better than Process B?"

"Should we go for this supplier or that supplier?"

"Is this machine worse than those machines?"

Comparative methods is about taking much of the guesswork out of such decisions. We quantify the confidence with which you can trust a result.

The techniques are based on Hypothesis Testing which modern software makes accessible to non-statisticians.

This training can be customised to suit a range of requirements. Simply give us a call and we can advise on the best solution for you.

Participants should have access to a PC with Excel or Minitab pre-installed.

If you don't have this software we can still help you.

We encourage students to bring their own data sets (if possible) which we can work on to make the training relevant to you.

Comprehensive course manuals are provided.

For more information please contact us.

"I'm Reasonably Sure. I Think. Probably!"

Really? You can do better than this!

We cover a broad variety of decision making situations and provide you with the steps to follow.

**"My confidence in making the right decisions has been transformed by the training."**

Practical, Relevant, Interactive Training

### OTHER TRAINING COURSES

Our menu of training courses continues to grow. See our web site. If you can't find the one you are looking for we will create it for you. Give us a call !
