Introduction To Minitab

A Range Of Courses For Beginners From
2 to 4 Days Duration

This is a beginners guide – we assume you haven't used Minitab at all before attending this training.

You will cover :

- Getting to know Minitab
- Minitab Worksheets and Project Manager
- Exploring and Interpreting Data
- Graphical Techniques – **Many and Varied!**
- Correlation Studies
- Normality Testing
- Summary Statistics
- Process Capability Studies
- Measurement Capability Studies
- ...and depending on your requirements, we can build in other topics.

This training can be customised to suit a range of requirements. Simply give us a call and we can devise the solution you need.

Participants should have access to a PC with Minitab and preferably also Excel pre-installed. We can help with the provision of laptops.

We encourage students to bring their own data sets (if possible) which we can work on and make the training very relevant to them.

A fully functional free 30 day trial is available from www.minitab.co.uk

Comprehensive course manuals are provided.

For more information please contact us.

Data Analysis Is Easy With Minitab!

"Minitab software is very capable, and so much easier than other options. This course has shown me how I can get an amazing insight into our data, allowing me to take decisions in a rigorous and highly productive way."

Practical, Relevant, Interactive Training

OTHER TRAINING COURSES

Our menu of training courses continues to grow. See our web site for details. If you can't find the one you are looking for we will create it for you. Give us a call!
