## Process Improvement With Minitab

A Range Of Courses Beyond Beginner Level

These courses assume that participants have already had a grounding in the use of Minitab, can use the basic functions of the software, and know how to perform graphical analysis.

There are a huge range of options that we can cover - hence we need to discuss your requirements with you to provide the best training possible.

Some examples might be :

- Process Control
- Quality Sampling
- Establishing Measurement Capability
- Hypothesis Testing
- Design of Experiments
- Prediction Techniques

This training can be customised to suit a range of requirements. Simply give us a call and we can devise the best solution for you.

Participants should have access to a PC with Minitab and preferably also Excel pre-installed. We can help supply laptops.

We encourage students to bring their own data sets (if possible) which we can work on to maximise the relevance of the training.

A fully functional free 30 day trial is available from [www.minitab.co.uk](http://www.minitab.co.uk)

Comprehensive course manuals are provided.

For more information please contact us.

Minitab – An Invaluable Tool For Process Improvement !

**“Minitab is such an easy, yet powerful tool for serious process improvement work. This training has shown me the best ways to utilise its many functions to help me drive improvement in my organisation.”**

Practical, Relevant, Interactive Training

### OTHER TRAINING COURSES

Our menu of training courses continues to grow. See our web site for details. If you can't find the one you are looking for we will create it for you. Give us a call!
